

Did you find the meeting interesting and easy to follow?	Do you have any feedback for us?
Yes, I loved the introductory signs – asking participants questions first and providing information/data right after.	Yes, the energy and excitement in the room was impressive. Just about every attendee who had a question was recognized and spoke. Their contributions to the visioning were enlightening
Yes	Best Wishes!
Yes, there are good interactions with everyone.	May be good to do this more frequently than once every 10 years.
Yes, Well thought out and run.	Should allow comments (like these) to be completed online.
Fun- people were energized! Chaotic to some degree – fine.	
Yes	Plans need to be realistic (i.e. working within the tax base). Build on what we already have.
I thought the meeting terrific. I liked the change from small groups to an open verbal response session to questions.	I was very impressed with the publicity for the event. It was a terrific turnout. Las time (13+ years ago), we had about 40-42 people show.
Interesting set up of the hall. Tables did takeup room, but did come in handy!	Good to have name tags. Asking us to post our “circles” was a great idea!!
Yes, Well done.	
Yes	Great to have large MAPC team here to facilitate meeting.
Yes, although the room size was obviously a challenge.	
Yes, the mix of activity and idea sharing kept it interesting.	
Liked the interactive posters. The MAPC group was very organized and plenty in number to assist.	It will be helpful to provide information and communicate electronically as more people might respond to a questionnaire than to come out physically to atten nightly meetings.
Interesting "activities" upon entry, but could have started formal program earlier	
Yes, loved the interaction and the dots to gague our priorities	
Yes, well organized and fun	
Meeting was interesting - understand it was for collecting information - hope you get a project/web site up soon to collect more input	
Yes, I liked the organization of the brainstorming process.	It's great to be ask for own input!
Great meeting! Loved all the interaction and creative way to give input. I felt you were genuinely interested in my input (and others!)	
Yes,it was really well organized and kept on topic.	No, like what you are doing.
Very well organized and gave people many ways to provide input	
It was interesting, but due to the crowd, I was not able to see all the set ups and get that input. Having the open questions worked much better than small group sessions.	Get the ideas that were generated in a format that people can view and think about before any new meetings. I had little idea what to expect to see/hear at this 1st meeting and want to be better prepared for the next one.
