Subject	Cost containment plans for proposed new public safety building
Message	What steps do you plan specifically to contain the cost of the proposed new public safety building? We must separate "wants" from "needs"! A new building should be a step up from the present structure and not a 'giant step' up, please. Cost is the most critical factor, especially these days! Since you've projected the proposed new building to last us for 20 years, I'd divide the total cost by 20 to see what the cost/per year would be if it finally is voted in the affirmative. Thank you for all your work on this project.
